20 February 1963

## MEMORANDUM FOR THE RECORD

SUB	JEC	T:	Section	45
-----	-----	----	---------	----

	25X1A9a
	1. With Drs. 1200 - 1300 today
	at Langley Headquarters I discussed production of subject for FY 64. In
X1A9a	answer to my question said OSI wanted to increase their annual total;
5X1A12a	he had been seen to be for John Clay's unit in PHS so that he could
	recruit two more analysts. Dr. and I compared our FY 64 schedules 25X1A9a
	and he added due dates to OBI. Angola was brought from FY 65 into FY 64
	as due in January. The schedule totals 9 sections for the year and was
	completed with the understanding that two more, probably Paraguay and
	Yugoslavia, would be added later, making a total of 11.
25X1A9	2. 2. Same and Dr. James Watt, who heads the International
	Health Division of PHS, was re-organizing himself into three components:
	administrative, internal, and external. He wanted to transfer to his external
	division John Clay's unit from Kain, who answers to Deputy Assistant Secretary
5X1A9a	Kevan. talked to Kain yesterday thinking that Kain should kn ow if HEW
X1A9a	was re-organising his activities. said that if Kain mentioned it to me.
	I could tell him that OSI, as the contractor, would not approve of this re-
	arrangement. I agreed, saying that I thought the arrangements for Section 45
	production in HEW were better now than ever before.
	3. In connection with what Steve Nickelsburg reported about MIIA
	responsibility for Section 45 production. said the former MIIA was 25X1A9a
	trying to preserve its identity. It was due to be fully absorbed into DIA on
	l March and have certain Navy personnel added to it. He commented upon
	this picturesque reversal, reminding us that the Army Surgeon General
	had been trying for years to get out of Section 45 production altogether.
	The state of the s

4. I said I wondered what would happen to the former "Health and Sanitary Data" put out by MIIA. said he thought this would neces-25X1A9a sarily continue because the NIS unfortunately was available only to users of classified material. He said the Section 45 should be sanitized and circulated more widely so that it could be used by the Peace Corps and other agencies concerned in overseas activities. thought this was feasible. He said OSI was continually re-writing scientific intelligence for wider use and that they were doing this with very little loss of essential facts.
